

Project Title: FlickReview

Project Description: FlickReview is an online platform designed for movie lovers to share and explore reviews. Users can post their thoughts, rate films, and browse through opinions shared by others. The application offers secure user authentication, allowing individuals to register and log in to manage their reviews easily. Key features include the ability to add, edit, delete, and view reviews, as well as search for movies by title or genre. Moreover, the platform will showcase aggregated ratings for each movie, based on user feedback.

Tasks the Software Can Help Users Complete:

1. Register for an account and log in securely.
2. Search for movies by title or genre.
3. Post reviews for movies, including a written review and a star rating.
4. Edit or delete their reviews.
5. View a list of reviews and ratings for a specific movie.
6. Browse trending or top-rated movies based on user ratings.

Technologies to Be Used:

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Express Framework
- **Database:** MYSQL (for storing user data, movie details, and reviews).
- **Version Control:** Git/GitHub (for collaborative development and version control).
